

Bikram Gorai

Backend / Full-Stack Developer

Asansol, West Bengal — 776-205-8095 — bikram77620@gmail.com

GitHub — LinkedIn — Portfolio

Summary

Backend-focused Computer Science undergraduate experienced in building full-stack applications using **Node.js, Express.js, MongoDB, and JavaScript**. Skilled in REST APIs, authentication, API security, rate limiting, database integration, and offline-first systems. Founder and lead developer of a product with **30+ lifetime users**; 3rd-place winner at a 36-hour hackathon.

Education

B.Tech in Computer Science and Engineering

2024 – 2028

Asansol Engineering College, West Bengal

CGPA: 8.12/10

Class XII: 71% **Class X: 86.7%**

Technical Skills

Languages: C++, Python, JavaScript **Databases:** MongoDB, Mongoose, IndexedDB, SQL (Learning)

Backend: Node.js, Express.js, REST APIs, API Design, Authentication, Authorization, OAuth, OTP, Middleware, API Rate Limiting, Third-Party APIs

Web: HTML, CSS, JavaScript, GSAP **Tools:** Git, GitHub, Vercel, Render, Postman

Experience

Founder & Lead Developer – Consistency Daily

2025 – Present

- Founded and developed a full-stack productivity platform with **30+ lifetime users**, owning product architecture, backend development, deployment, and feature development.
- Built a secure **Node.js/Express.js + MongoDB** backend with authentication, validation, API security, rate limiting, and third-party integrations.
- Designed an **offline-first architecture** using IndexedDB for local persistence and synchronization, with APK/mobile support.
- Integrated **payment/subscription infrastructure**, Groq-powered AI coaching, LeetCode integration, squad accountability, and distraction-blocking features.

Projects

Eventix – Event Management & Automated Ticketing

Live — GitHub

- Built a full-stack platform centralizing college event creation, registration, ticketing, and attendance management with **multi-role portals** and team registrations.
- Implemented automated **PDF e-tickets, QR codes, and QR-based attendance verification** to streamline manual event-entry workflows.
- Developed centralized club/society workflows for event creation, collaboration, management, and student discovery.

Tech: JavaScript, Node.js, Express.js, MongoDB, Mongoose, HTML, CSS

Anya – Voice AI Companion

Live — GitHub

- Built a voice-native AI companion using **Node.js, MongoDB, and Vanilla JavaScript** with persistent conversational memory.
- Implemented **384-dimensional vector embeddings**, episodic event logs, and adaptive personality tracking for contextual interactions.

Tech: JavaScript, Node.js, Express.js, MongoDB

Achievements

3rd Place – CODE@FROST Hackathon

36-Hour Hackathon

- Secured **3rd place** with a four-member team and received the **Best Buddy Award** for collaboration.
- Built a hyperlocal service marketplace with **5–10 km location-based discovery, bidding, and reputation scoring** under the Glacier Commerce – FinTech & E-Commerce track.

Overclocked – Development Society AEC: Participated in an offline hackathon and collaboratively developed Eventix for centralized college event management.
